ARCHITECTURE AFTER ALL

**EDITORS:** Marcus Carter, Christopher Marcinkoski,  
Forth Bagley and Ceren Bingol

*Perspecta 38: Architecture After All* probes various issues of contemporary research and practice—globalization, urbanism, ideology, image and technology, as well as form, pedagogy, theory and meaning. The essays are cross-sections of a larger topic at hand, as the field calibrates itself through investigation of network practices and interdisciplinary exchange, the changing role or relevance of theory, and technique enabled by technology.
